

## AMENDMENTS TO THE CLAIMS

Please replace the claims with the following listing of claims:

1-10. (Cancelled)

11. (Currently Amended) A suspension concentrate consisting of

(a) between 10 and 40% by weight, based on the suspension concentrate, of at least one active compound that is solid at room temperature selected from the group consisting of azaconazole, bitertanol, bromuconazole, ciproconazole, dielobutrazole, difenoconazole, diniconazole, epiconazole, etaconazole, fenbuconazole, fluquinconazole, flusilazole, flutriafol, imibenconazole, ipeconazole, myclobutanil, paclbutrazol, penconazole, propiconazole, prothioconazole, simeconazole, tebuconazole, tetriconazole, triadimenol, triadimenol, triticonazole, dimoxystrobin, fluoxastrobin, kresoxim methyl, metaminostrobin, picoxystrobin, pyraclostrobin, and trifloxystrobin prothioconazole, tebuconazole, metaminostrobin, and trifloxystrobin,

(b) between 5 and 20% by weight, based on the suspension concentrate, of at least one penetration enhancer selected from the group consisting of alkanolethoxylates of formula (I)

wherein

m represents numbers from 9-13, and

n represents numbers from 8-12,

(c) between 3 and 8% by weight, based on the suspension concentrate, of at least one dispersant mixture selected from the group consisting of

(i) a polymer of methyl 2-methyl-2-propenoate and  $\alpha$ -(2-methyl-1-oxo-2-propenyl)- $\omega$ -methoxypoly(oxy-1,2-ethanediyl) (CAS No. 111 740-36-4) and tristyrylphenolethoxylate having an average of 50 to 60 oxyethylene units,

(ii) a polymer of methyl 2-methyl-2-propenoate and  $\alpha$ -(2-methyl-1-oxo-2-propenyl)- $\omega$ -methoxypoly(oxy-1,2-ethanediyl) (CAS No. 111 740-36-4) and a propylene oxide/ethylene oxide block copolymer having a molecular weight between 8000 and 10,000 and an ethylene oxide proportion of between 40 and 60% by weight, and

(iii) a tristyrylphenolethoxylate having an average of 50 to 60 oxyethylene units and a propylene oxide/ethylene oxide block copolymer having a molecular weight between 8000 and 10,000 and an ethylene oxide proportion of between 40 and 60% by weight,

d) between 40 and 65% by weight, based on the suspension concentrate, of water, and

e) between 0 and 15% by weight, based on the suspension concentrate, of one or more additives.

12-13. (Cancelled)

14. (Previously Presented) A suspension concentrate according to Claim 11, wherein component (a) is tebuconazole.

15. (Previously Presented) A suspension concentrate according to Claim 11, wherein component (a) comprises tebuconazole and trifloxystrobin.

16. (Previously Presented) A suspension concentrate according to Claim 11, wherein

component (a) comprises prothioconazole and fluoxastrobin.

17. (Previously Presented) A suspension concentrate according to Claim 11, wherein component (a) is trifloxystrobin.

18-21. (Cancelled)

22. (Previously Presented) A suspension concentrate according to Claim 11 wherein m represents 11 and n represents 10.

23-24. (Cancelled)

25. (New) A suspension concentrate according to Claim 11, wherein component (a) is prothioconazole.

26. (New) A suspension concentrate according to Claim 11, wherein component (a) is metaminostrobin.

27. (New) A suspension concentrate according to Claim 11, wherein the at least one dispersant mixture comprises a polymer of methyl 2-methyl-2-propenoate and  $\alpha$ -(2-methyl-1-oxo-2-propenyl)- $\omega$ -methoxypoly(oxy-1,2-ethanediyl) and tristyrylphenolethoxylate having an average of 50 to 60 oxyethylene units.

28. (New) A suspension concentrate according to Claim 11, wherein the at least one dispersant mixture comprises a polymer of methyl 2-methyl-2-propenoate and  $\alpha$ -(2-methyl-1-oxo-2-propenyl)- $\omega$ -methoxypoly(oxy-1,2-ethanediyl) and a propylene oxide/ethylene oxide block copolymer having a molecular weight between 8000 and 10,000 and an ethylene oxide proportion of between 40 and 60% by weight.

29. (New) A suspension concentrate according to Claim 11, wherein the at least one dispersant mixture comprises a tristyrylphenolethoxylate having an average of 50 to 60 oxyethylene units and a propylene oxide/ethylene oxide block copolymer having a molecular weight between 8000 and 10,000 and an ethylene oxide proportion of between 40 and 60% by weight.

30. (New) A suspension concentrate according to Claim 11, wherein the at least one active compound is present in an amount of between 20 and 30% by weight.

31. (New) A suspension concentrate according to Claim 11, wherein the at least one penetration enhancer is present in an amount of between 10 and 15% by weight.

32. (New) A suspension concentrate according to Claim 11, wherein the at least one dispersant mixture is present in an amount of between 3 and 5% by weight.

33. (New) A suspension concentrate according to Claim 11, further comprising one or more additives e) selected from the group consisting of antifoams, antifreeze agents, preservatives, antioxidants, colorants, vegetable oils, thickeners, and inert fillers.

34. (New) A suspension concentrate according to Claim 11, further comprising as e) a preservative; a defoamer selected from the group consisting of silicone oil and magnesium stearate; an antifreeze agent selected from the group consisting of urea, glycerol, and propylene glycol; and a thickener.

35. (New) A suspension concentrate according to Claim 11, further comprising as e) butylated hydroxytoluene.

36. (New) A suspension concentrate according to Claim 11, further comprising as e) a vegetable oil selected from the group consisting of sunflower oil, rapeseed oil, olive oil, and soybean oil.
